Your Brands, In Trusted HandsSM

Kleen Test Products is one of the world's largest contract manufacturers and packagers of wet wipes, dryer sheets, nonwoven and liquid products. For more than 65 years, Kleen Test has been helping companies of all sizes save time and money by discreetly manufacturing and packaging their consumer products. They provide seamless outsourcing, with the highest regard for the confidentiality of their customers.

Kleen Test Headquarters in Port Washington, Wisconsin

Kleen Test's state-of-the-art FDA and EPA registered manufacturing plants have the ability to efficiently handle many diverse manufacturing and packaging needs. With five plants in southeastern Wisconsin and two more in Ohio, they are able to segregate confidential products and flexibly staff peaks in demand. Kleen Test has the resources and the technical expertise to take your ideas from conception to completion, shortening your lead time to market.

Wet Wipes -- Kleen Test Products is one of the world's largest manufacturers of wet wipes. In fact, many of the wet wipe products launched in the last 30 years were manufactured by Kleen Test. Kleen Test can pack wet wipes into canisters, tubs, cartons, single packs, rigid and flexible packs, and has the ability to cut and cross-fold, flat fold and interleave substrates.

Kleen Test recently joined forces with Taiki USA to expand usage of Taiki's patented "D Cap" flow wrap fitment products. The "D Cap" flow wrap and fitment were strategically designed to maximize product life by keeping products fresh and moist.

Dryer Sheets -- For over 30 years, Kleen Test Products has been a major player in the fabric softener sheet market. Today, they are

one of the largest manufacturers of fabric softener sheets in the world, with shipments to North America and beyond.

Die-Cutting -- Kleen Test is the world's largest precision die-cutter of pads for cosmetic, OTC and personal care applications. Utilizing their in-house die-cutting capability, they can be your one-stop shop for jar-filled products.

Multi Layer Sonic Bonding -- Does your product require multiple layers of substrates bonded together? Kleen Test has multiple production lines capable of sonically bonding different substrates together and then die cutting them into their final shape. They can produce products with up to four layers that are cut into any shape you desire. For formula delivery, these products can be dry coated, coated during production or wetted out post cutting.

Mitt produced using sonic bonding

Liquid, Tube & Jar Filling -- Kleen Test Products has a 210,000 square foot facility dedicated to liquid filling of household, personal care and OTC products. They fill jars, bottles and tubes with capacities ranging from one ounce to five gallons. They also custom blend for shipment in drums, totes and tankers.

Specialty Packaging -- Kleen Test has custom and secondary packaging capabilities company-wide, allowing customers to simplify supply chains by having their promotional packaging done online. Kleen Test demonstrates their flexibility in the wide array of packaging options available, including thermoformed blisters, cartoning, tipping, multipacks, displays, and sampling vehicles.

Simple, but pervasive principles guide Kleen Test's production, their business, and their values. Kleen Test Products relentlessly strives to exceed customer expectations in quality, delivery and value. "We actively foster a culture of innovation, collaboration and trust – with our employees and our customers. We continually challenge ourselves to create better practices and processes," said Bill Ahlborn, President of Kleen Test.
